

Ensure a straight and neat installation with the Boss Solar

# MANIFOLD TRAY

The Boss Solar Manifold Tray supports pipework and manifolds, keeping them out of the roof valleys while ensuring a straight and neat installation.

Pipework is secured to the Manifold Tray using UV resistant cable ties in place of saddles. This reduces roof penetrations, making it ideal for Klip-lok or Spandek roofs. Manifold Trays can support up to three pipes, including the Balance Pipe and the Supply and Return Header Pipes.

They are 1200mm(L) x 195mm(W) and are finished in a black powder coat for increased durability and rigidity.

## WHY CHOOSE THE MANIFOLD TRAY?

**REDUCE ROOF PENETRATIONS**

**ENSURE A STRAIGHT AND NEAT INSTALLATION**

**LIFT PIPES OUT OF ROOF VALLEYS**

**IDEAL FOR KLIP-LOK OR SPANDEK ROOFS**

**INTERLOCK FOR QUICK ROOF INSTALLATION**
