- **Potable water approved**
AS 4020
- **Quick skin time**
- **Non-Corrosive**
- **Building approved**
BS 5889
- **Low VOC formula (<50gm/l)**

PROSIL 60 BLACK

WHY USE PROSIL 60 BLACK

Unlike silicones purchased at general hardware stores, Prosil 60 silicone has been specifically designed for the solar market and is 100% silicone. Generic silicones adhesives generally contain fillers and extenders, which have the potential to damage the collector tubing over time. Prosil 60 has been purpose built for this application and has a proven track record for high performance.
