# ECO GREEN™

## Earth's Choice Seriously Tough Sustainable Solar

Proudly Manufactured By:

Australian Made  
and Owned

### Revolutionising solar pool heating with EcoGreen

Imagine harnessing the power of the Sun's free energy with a product that's not only more efficient, but also environmentally friendly. Introducing EcoGreen, the latest breakthrough in solar pool heating collector technology.

Designed with Cutting-Edge Bio-Plasticizers, EcoGreen sets a new standard in eco-friendly energy solutions for the pool heating industry. By choosing EcoGreen, you're not just opting for 100% renewable heating, you're embracing a future where sustainability and innovation go hand in hand.

**EcoGreen is Earth's choice in sustainable pool heating.**  
**Using EcoGreen helps save our planet.**

### EcoGreen, The smart choice in solar pool heating

EcoGreen solar collectors are crafted using Bio-Plasticizers derived from renewable resources such as plant oils. Unlike traditional petrochemical plasticizers that rely on finite fossil fuels, EcoGreen supports a sustainable future, reducing our carbon footprint and conserving precious resources.

EcoGreen isn't just about harnessing solar energy and helping your pool reach desired temperatures; it's about doing it sustainably. Production of EcoGreen Bio-Plasticizers generates fewer carbon emissions compared to traditional petrochemical alternatives. This means you can enjoy your swimming pool with efficient solar energy while knowing you're helping do your part to help the planet.

 **MULTILAYERED**  
 Eco-Sustainable Composite Solar Collector

**THIS IS HOW WE MAKE IT**

- ✓ Large 8mm collector tubes
- ✓ MaxBlack Outer Material
- ✓ Absorbs 20% more heat
- ✓ 18% more water being heated

- ✓ Eco-Sustainable inner layer
- ✓ Reducing carbon footprint
- ✓ Conserving precious resources
- ✓ Supports a sustainable future

**Australia's Largest Manufacturer for 35 Years**
