**Australian Made Solar Pool Heating**

MANUFACTURED BY:

# Turning backyards into ultimate hangout spots

Get more out of your pool with the Ready To Go Flexible Solar Pool Heating System! Made tough for Aussie conditions and a breeze to set up, this system can increase water temperatures by more than 10°C.

Just think of all the extra parties, longer swims and more fun with the kids you could have throughout the year with those extra months of time in your pool. Whether you are installing the Ready To Go system yourself or getting some help, we are here to support you from start to finish!

## Why Choose Ready To Go Solar?

We take the guess work out of heating your pool, without blowing the budget. Every Ready To Go Solar System is designed for an easy installation:

- Ready to install kit system
- Quick & easy installation. Get up and down the roof in no time!
- No specialist skills or tools required
- Available in standard kit sizes of: 10.7kW, 16.3kW or 24kW
- Fully customised kits available on request, just contact us for more information

## Easily Assembled

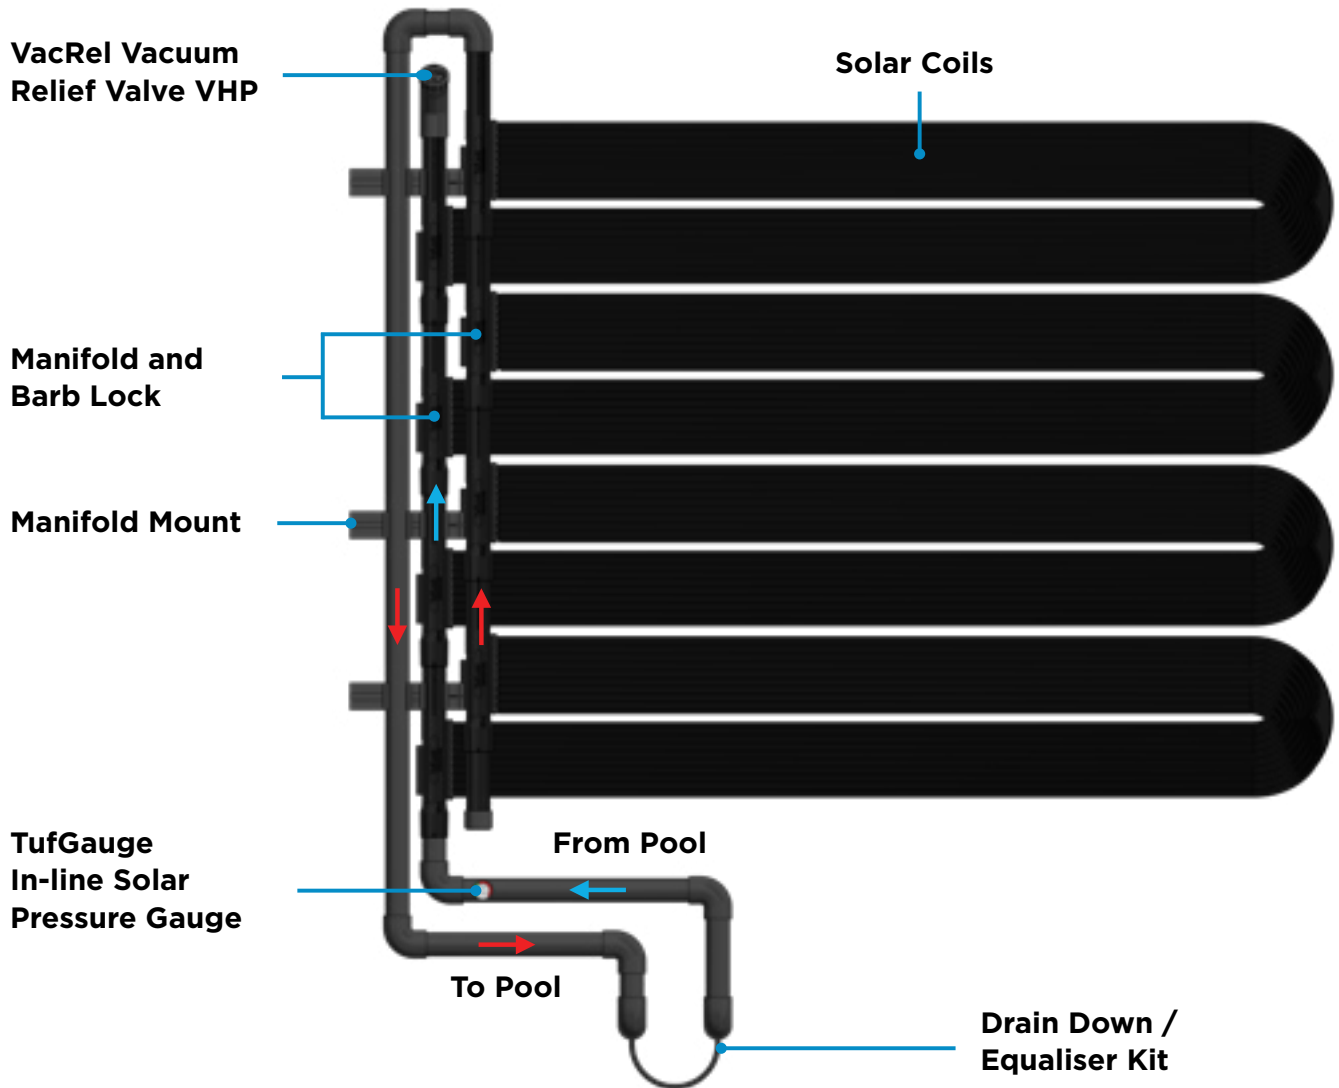

- 1. Secure and Durable Fixing System**  
Rapid and secure installation of manifolds and pipes.
- 2. Easy Installation**  
Save time using Quick-Lok connectors – Just insert and secure with the supplied clips.
- 3. Panel Coils**  
Solar Panel Kits available in 3 standard roof lengths or fully customised to suit almost any roof.
- 4. Solar Collectors**  
Pre-cut and supplied at a length that suits your needs.

## Ready to order?

To order a Ready To Go Solar System. You can easily enquire online for immediate dispatch or alternatively, you can contact us, provide the installation house address, and we'll handle everything for you.

For further details, call us at 1300 786 489.

# How it Works?

The pool is heated by circulating water through the thermal solar pool heating collectors which are mounted to the roof of the building. The solar collectors absorb the sun's heat and transfer it to the pool water. The heated water is then returned to the pool. Most solar systems include a separate pump and automatic solar controller to maximise heating efficiency and control.

Thermal Solar Pool Heating systems can be fitted to either new or existing pools.

\*Please refer to the Boss Pool Heating website for our standard Terms & Conditions and warranty documentation.
