# NANO X™

MULTILAYERED

Nano Graphitic Composite Solar Collector

**56%\***  
higher heating  
performance

say goodbye to  
pool blankets!

Responsibly &  
sustainably, using  
only the sun's free  
energy

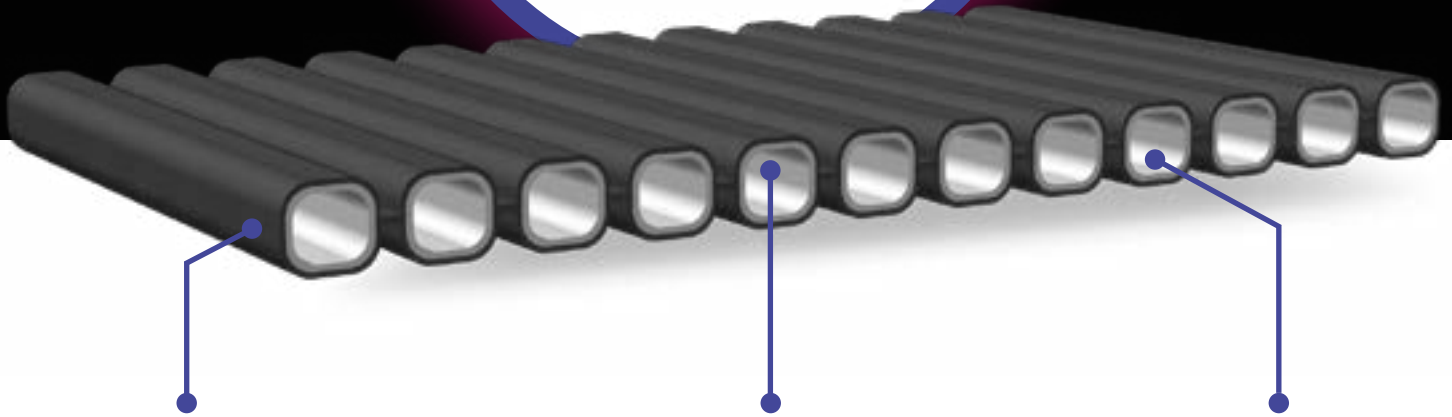

## Boss NanoTek Technology: Made Extreme

The World's Most Extreme Performance Strip Collector  
Advanced Nano-Graphitic Composite Technology

- ✓ Increased swimming season with the same coverage
- ✓ Reduced system running time to achieve desired results with the same coverage
- ✓ Up to 40% less coverage (if roof space is an issue)
- ✓ Less reliance on a pool blanket to retain heat and minimise heat loss overnight

UP TO  
**316\*** kWh  
 PER DAY OF  
 FREE HEAT

### MaxBlack Outer Material

- ✓ Matte outer surface absorbs 20% more solar radiation\*
- ✓ Enhanced solar absorption results in increased heating efficiency.
- ✓ Maximum ozone and UV resistance.
- ✓ Improved toughness to resist mechanical damage.

### Larger 8mm Tubes

- ✓ New 12 Tube collector with large 8mm x 8mm water channels.
- ✓ 77% collector effective heating surface area.
- ✓ 3.6L of water per square metre of collector.
- ✓ Lower water flow rate for increased heat absorption.
- ✓ Less back pressure.

### Nano-Graphitic Inner Layer

- ✓ 75% improved thermal conductivity\*
- ✓ Transfers the sun's free energy quicker.
- ✓ Maximum chemical resistance.
- ✓ Enhanced resistance to flex fatigue.
- ✓ Maximum sealing retention to barbs.
